

# HEALTHY kids start with healthy HEARTS

## The most important 30 minutes of your child's life

Register your child for the ATS HeartCheck which includes Blood Pressure, electrocardiogram (EKG), and echocardiogram (heart ultrasound), all delivered by local medical professionals certified in congenital and genetic heart conditions who make their living saving kids lives every day. You won't find a better screening anywhere!

It's as simple as finding an upcoming event that is convenient for your schedule. Your child does not need to attend the school or organization where the event is being held.

### Meet Grace!

Grace is a 16 year old who loves softball and volleyball. In fact, she excels in both sports. About 3 years ago, Grace's mother signed her up for a heart screening at her school. Grace really didn't want any part of it, but went along begrudgingly. What came next was a complete shock to Grace and her mom. The screening detected a 15mm hole in her heart that she had from birth and the hole was causing her heart to dangerously enlarge. Since discovering the defect, she's had corrective surgery and is excelling more than before. Grace says she could have died from the defect. She feels fortunate she went along with her mother's wishes and got the screening.
